

Cessna Aircraft Company Raytheon Missile Systems AIAA Foundation

The 2011 Cessna Aircraft Company/Raytheon Missile Systems Design/Build/Fly Competition Flyoff was held at TIMPA Field in Tucson, AZ on the weekend of April 15-17, 2011. This was the 15th year the competition was held. Of the record 94 entries this year, 82 teams submitted written reports to be judged. 70 teams attended the flyoff, all of which completed the technical inspection. Over 700 students, faculty, and guests were present. The weather was sunny and warm allowing for non-stop flying. Of the 207 official flight attempts, 133 resulted in a successful score divided among 55 teams. Thirty-three teams successfully completed all three missions. The quality of the teams, their readiness to compete, and the execution of the flights continues to improve each year. This year's requirement to pre-inspect the airplanes with an advisor before the competition sped up the technical inspections and expedited teams getting to a flight attempt.

The contest theme this year was a Soldier Portable UAV. The airplane had to fit in a commercially available suitcase meeting airline carry-on requirements. The first mission was a "dash to critical target" with no payload followed by an Ammo Re-supply mission (steel bar payload) and a Medical Supply mission (golf balls). As usual, the total score is the product of the flight score and written report score. More details on the mission requirements can be found at the competition website: <http://www.aiaadb.org>.

First Place went to Georgia Tech University Team *ThereWillBeBuzz*, Second Place went to University of Southern California Team *The RFB* and Third Place went to Purdue University Team *Golfstream*. A full listing of the results is included below. The Best Paper Award, sponsored by the Design Engineering TC for the highest report score, went to Technion University Team *GolfiTech* with a score of 98.50.

We owe our thanks for the success of the DBF competition to the efforts of many volunteers from Cessna Aircraft, Raytheon Missile Systems, and the AIAA sponsoring technical committees: Applied Aerodynamics, Aircraft Design, Flight Test, and Design Engineering. These volunteers collectively set the rules for the contest, publicize the event, gather entries, judge the written reports, and organize the flyoff. Thanks also go to the corporate Sponsors: Raytheon Missile Systems and Cessna Aircraft Company, and also to the AIAA Foundation for their financial support. Special thanks go to Raytheon Missile Systems for hosting the flyoff this year.

Finally, this event would not be nearly as successful without the hard work and enthusiasm from all the students and advisors. If it weren't for you, we wouldn't keep doing it.

Russ Althof
For the DBF Governing Committee
